LUSAKA.

Dear Sir/madam,

RE: MEDICAL BOARD: ABRAHAM KAMANGA

This is in respect to your request in a letter dated 13th February, 2018 in which you requested the medical superintendent to convene a medical board for Mr. Abraham Kamanga.

The medical board session was conducted on 22.02.18 at 14:07 hours at Solwezi General Hospital for the purpose of reporting on the suitability of the said personnel to continue with his current employment or be discharged on Medical Grounds.

Findings:

- i. RVD Reactive on treatment since 2014.
- ii. Gastritis and syphilis for which he received treatment in 2016.
- iii. Paraparesis resulting from bony destruction with compression of the spinal cord at T2/T3 vertebrae as revealed by an MRI. He, as a result, received TB treatment, and underwent spinal surgery while at University Teaching Hospital.
- iv. Currently, he has regained full power although continues to use a Lumbar corset for spinal support.

Recommendations of the Board:

Although he has good recoveries, the board recommends that he be discharged on medical grounds. Kindly refer to the attached copy of the medical report.
